

# RESEARCH DATA MANAGEMENT & ACCESS OP RESEARCH WORKSPACES

# RDM & VRE: wie is wie?

*"Research data management is an explicit process covering the creation and stewardship of research materials to enable their use for as long as they retain value."*

Digital Curation Center  
(ook in LCRDM glossary)

*Een Virtual Research Environment (VRE) is een virtuele werkomgeving voor onderzoekers. [...] Daarin zijn combinaties van vijf verschillende drijfveren te onderscheiden die bepalen hoe deze werkomgevingen worden gerealiseerd:*

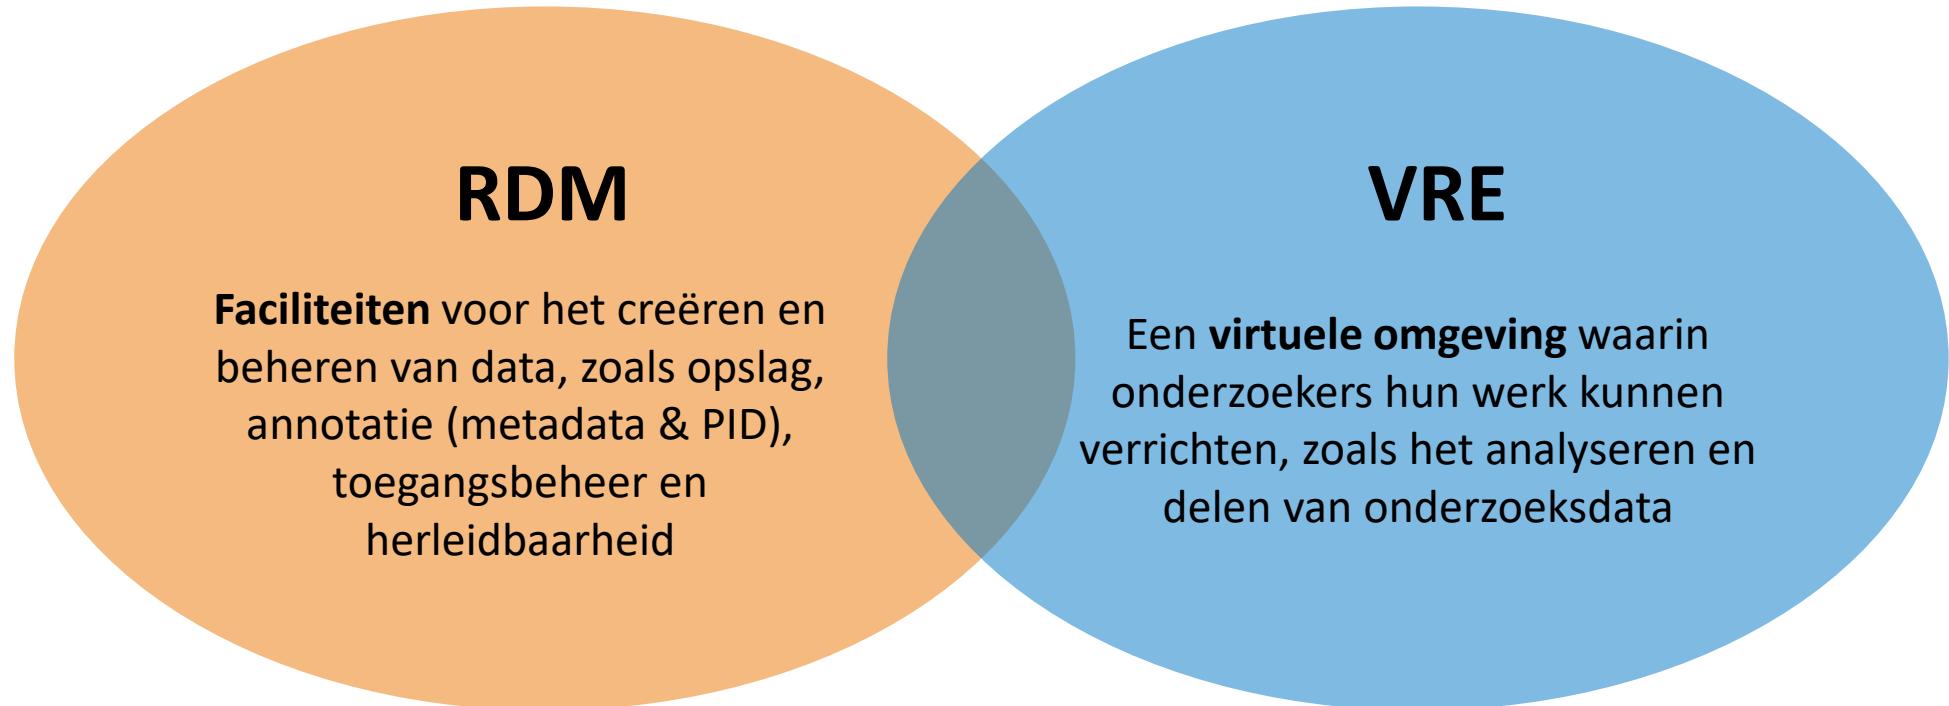

- Automatiseerbaar
- Veilig
- Laagdrempelig
- Schaalbaar
- Samenwerking

LCRDM 'VRE leaflet'

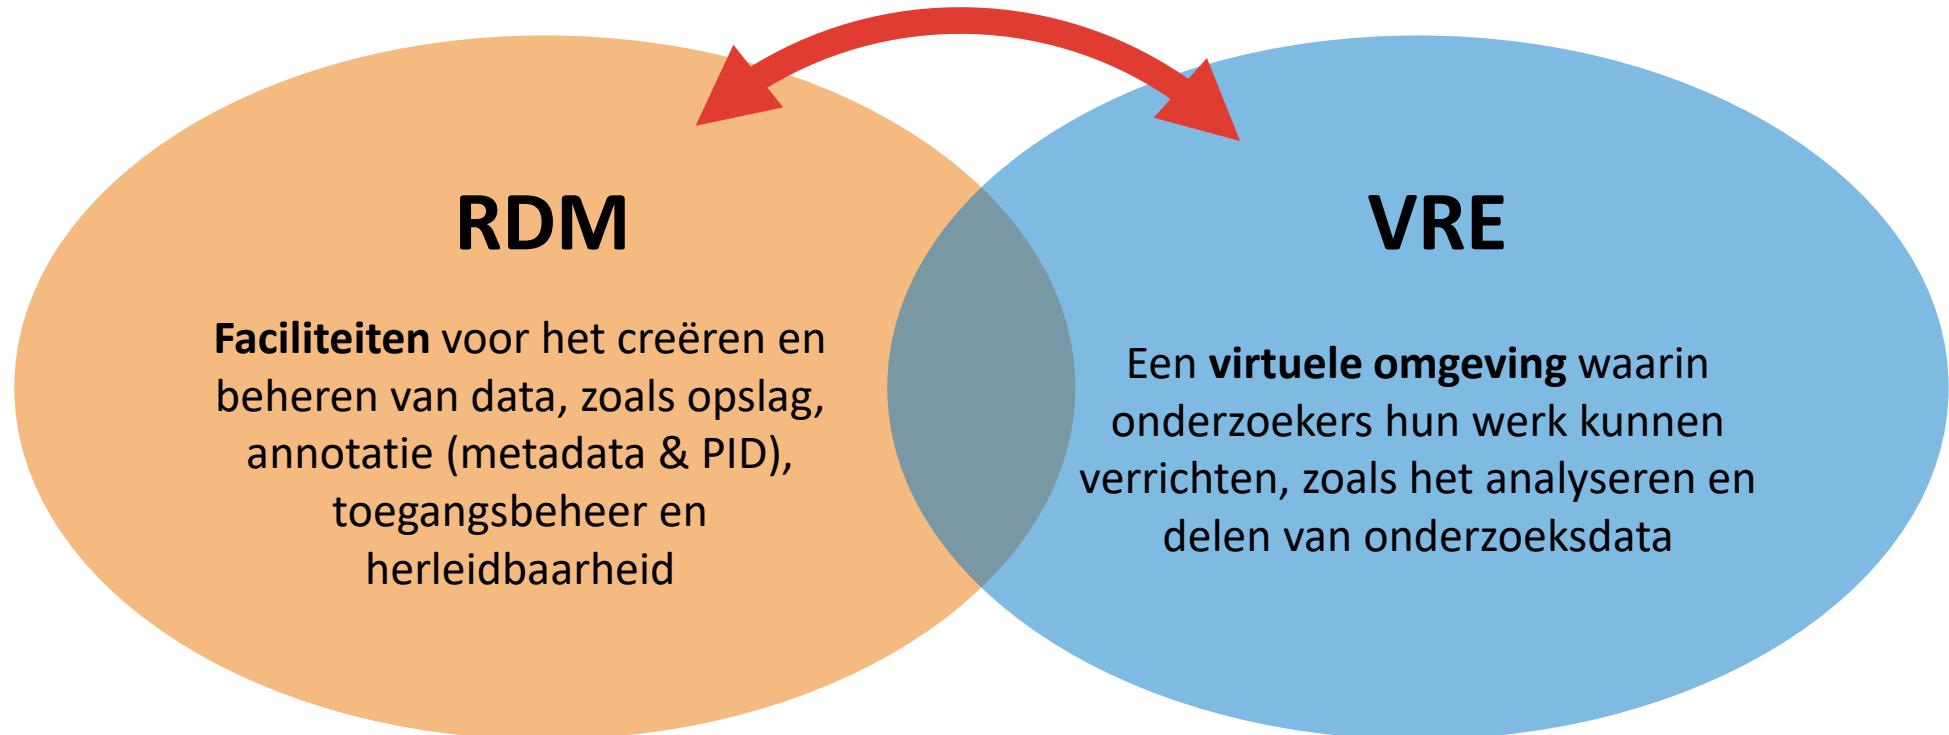

Landelijk Coördinatiepunt  
Research Data Management

# RDM & VRE: een (persoonlijke?) werkdefinitie

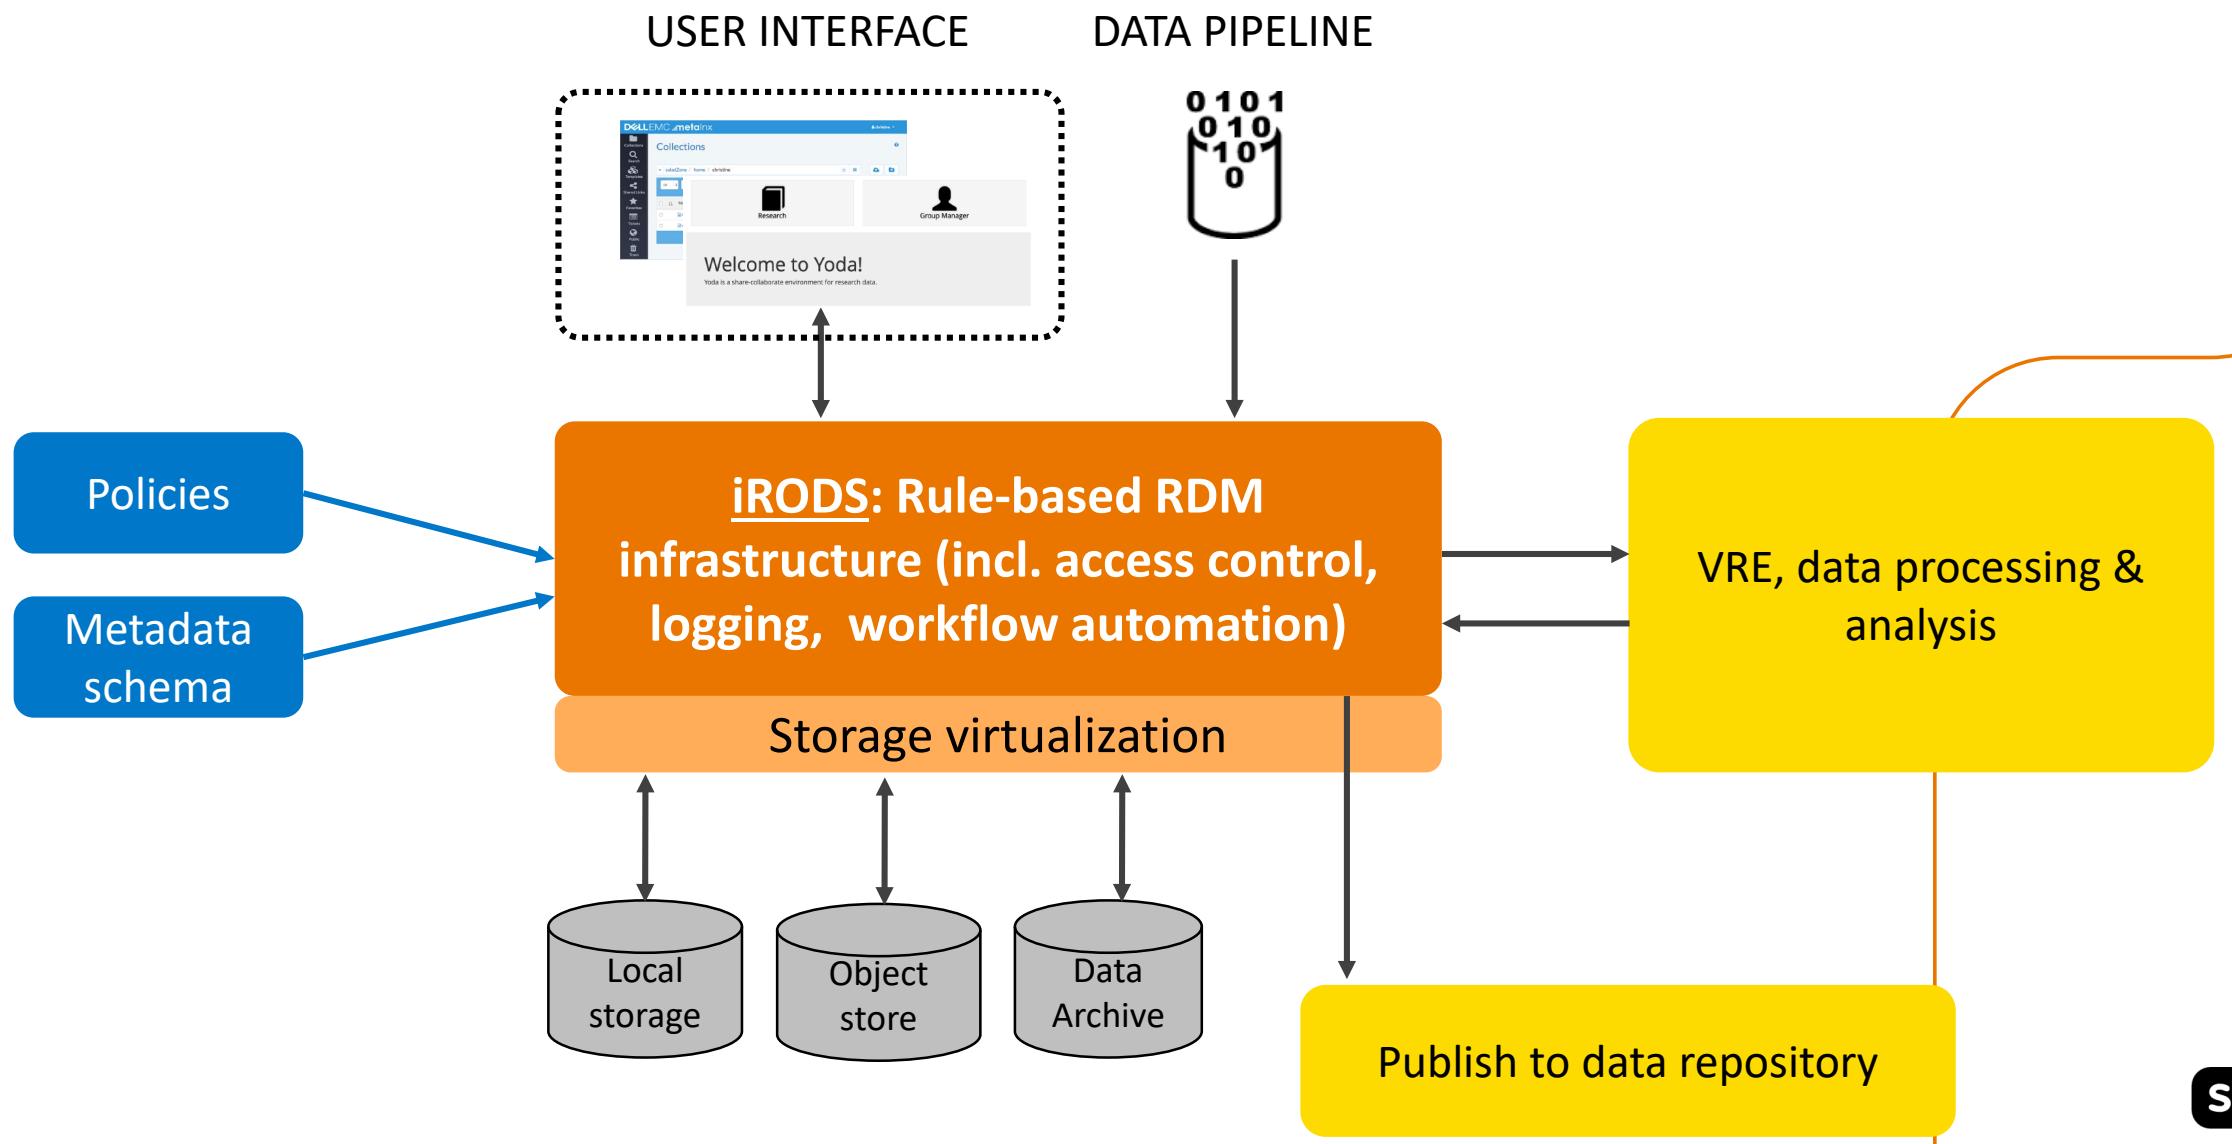

# RDM & VRE: een (persoonlijke?) werkdefinitie

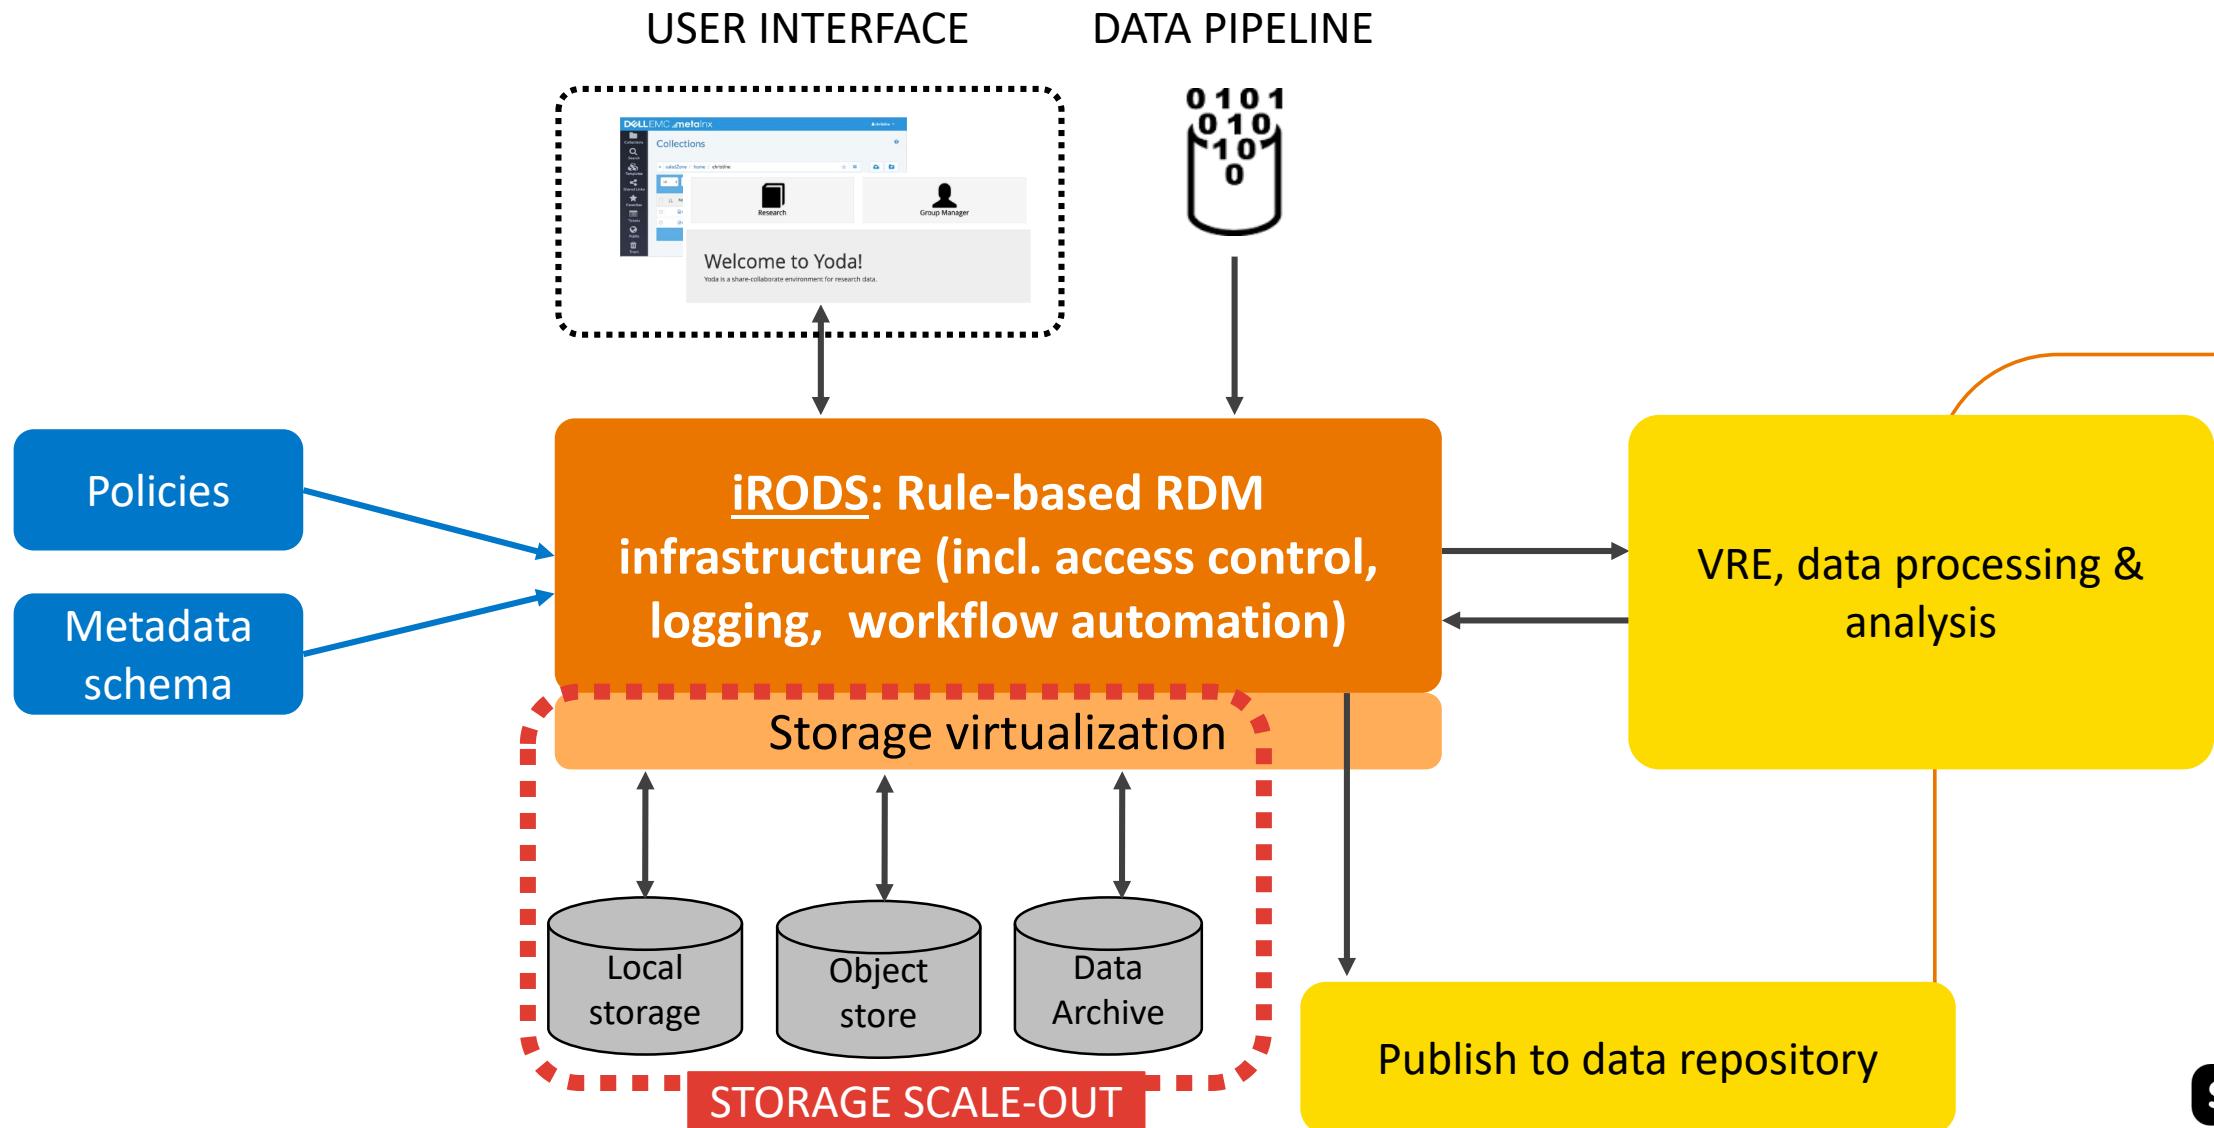

# Welke bouwblokken biedt een RDM systeem?

- Vindbaarheid van data (metadata en meer)
- “Track-and-trace” (provenance) van data van experiment tot analyse tot publicatie/archivering
- Automatisering van data opslag en de bijbehorende trade-offs zoals:
  - Data dicht bij compute nodes voor snelle bewerking; vs.
  - Data op tape voor kosteneffectieve lange-termijn opslag.
- Beheren van metadata volgens community standaarden
- Toegangsrechten op data
- Data (automatisch) beschikbaar maken in de virtuele werkomgeving
- Data publiceren in een data repository vanuit de werkomgeving

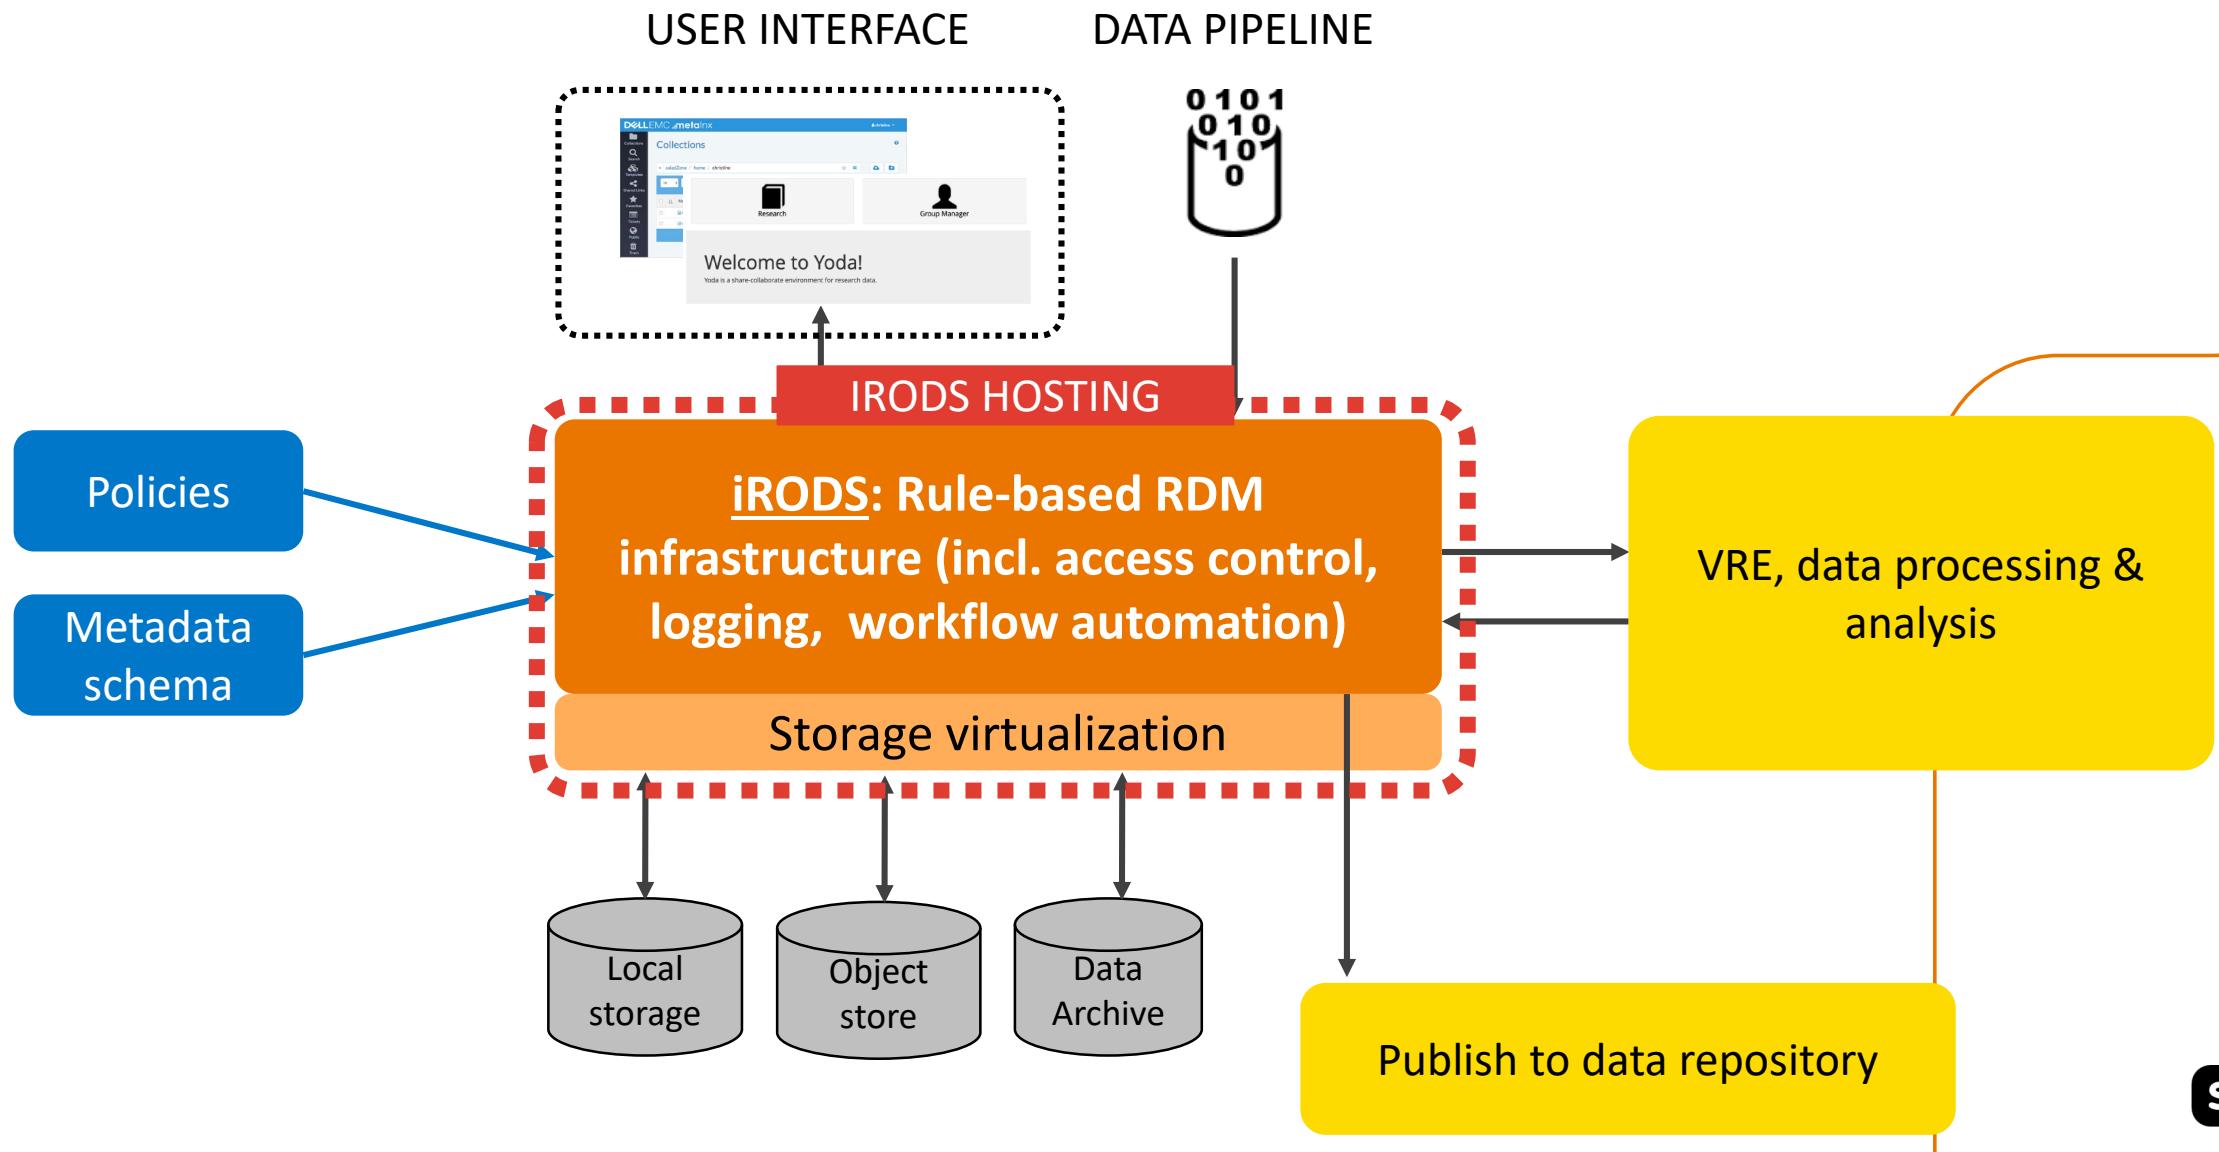

# Dienstontwikkeling: RDM modules met iRODS als ‘spin in het web’

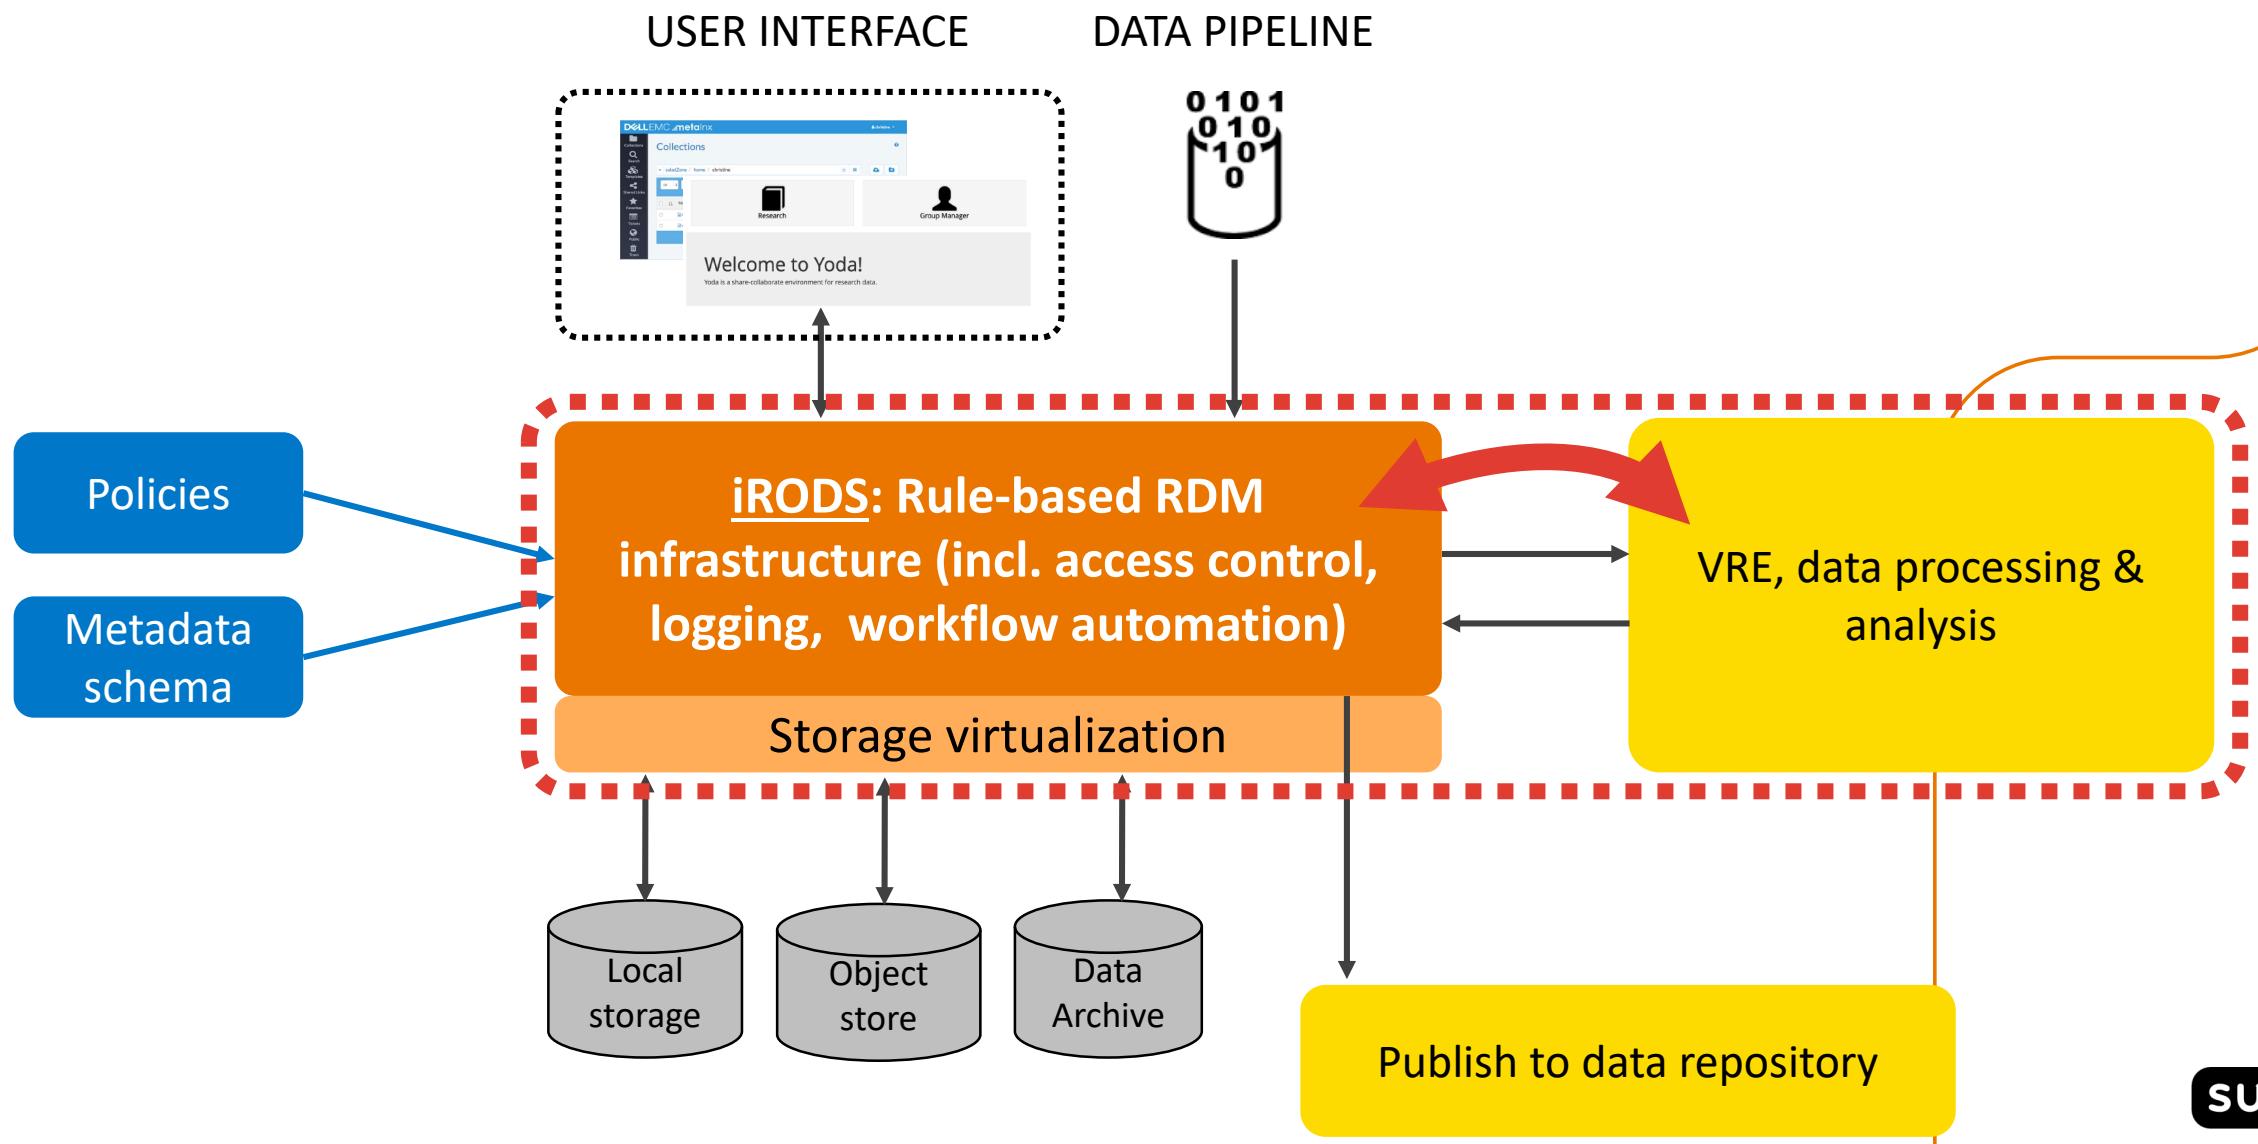

# RDM module: Storage scale-out service

# RDM module: iRODS hosting

# Dienstontwikkeling: RDM modules met iRODS als ‘spin in het web’

# Integratie iRODS en VRE

iRODS data sets can be accessed in multiple ways from a VRE

**Bridges** are software clearly connecting iRODS with a specific framework/platform.  
While **Extensions** are software which extend iRODS interoperability, but are not targeting a specific platform.

Work in progress!

## API:

- **GoRODS**: <https://github.com/jjacquay712/GoRODS>
- **Minio iRODS Gateway (S3)**:  
<https://github.com/bioteam/minio-irods-gateway>
- **Perl-irods-wrap**: <https://github.com/wtsi-npg/perl-irods-wrap>
- **C/C++**: <https://github.com/irods/irods>
- **Java jargon**: <https://github.com/DICE-UNC/jargon>
- **REST API**: <https://github.com/DICE-UNC/irods-rest>
- **iRODS-PHP**:  
<https://github.com/UtrechtUniversity/irods-php/tree/development>
- **python-irodsclient**: <https://github.com/irods/python-irodsclient>

## Bridges:

- **Ri rods**:  
[https://github.com/irods/irods\\_client\\_library\\_r\\_cpp](https://github.com/irods/irods_client_library_r_cpp)
- **Parrot VFS**: <http://ccl.cse.nd.edu/software/parrot>
- **irods\_client\_library\_r\_rest**:  
[https://github.com/irods/irods\\_client\\_library\\_r\\_rest](https://github.com/irods/irods_client_library_r_rest)
- **jupyterlab\_irods**: <https://github.com/towicode/JLab>
- **irods\_tools\_lustre**:  
[https://github.com/irods-contrib/irods\\_tools\\_lustre](https://github.com/irods-contrib/irods_tools_lustre)
- **Samba**: [https://github.com/davorvusir/vfs\\_stor](https://github.com/davorvusir/vfs_stor)
- **GridFTP**:  
<https://github.com/EUDAT-B2STAGE/B2STAGE-GridFTP>

## Clients:

- **Kanki**: <https://github.com/ilarik/kanki-irodsclient>
- **Tears**: <https://github.com/whitwham/tears>
- **ishell**: <https://github.com/nieess/ishell>
- **Cloud Browser**: <https://github.com/DICE-UNC/irods-cloud-browser>
- **Metalnx**: <https://github.com/irods-contrib/metalnx-web>
- **iDrop**: <https://github.com/DICE-UNC/idrop>
- **icommand**: [https://github.com/irods/irods\\_client\\_icommands](https://github.com/irods/irods_client_icommands)
- **NFSRODS**: [https://github.com/irods/irods\\_irods\\_client\\_nfsrods](https://github.com/irods/irods_irods_client_nfsrods)
- **Baton**: <https://github.com/wtsi-npg/baton>
- **Fuse**: [https://github.com/irods/irods\\_irods\\_client\\_fuse](https://github.com/irods/irods_irods_client_fuse)
- **Davrods**: <https://github.com/UtrechtUniversity/davrods>
- **Cyberduck**: <https://cyberduck.io/irods/>

## Extensions:

- **iRODS Automated Ingest Framework**:  
[https://github.com/irods/irods\\_capability\\_automated\\_ingest](https://github.com/irods/irods_capability_automated_ingest)
- **S3 resource**:  
[https://github.com/irods/irods\\_resource\\_plugin\\_s3](https://github.com/irods/irods_resource_plugin_s3)

# Integratie iRODS en VRE

- Data bestanden
- Metadata
- Toegangsrechten (access & identity)
- Schaalbaarheid
- Gebruiksvriendelijkheid

*Een aantal opties:*

- iRODS als mounted file system via NFS
- ‘Dropbox’-like folder met DavRODS
- Via SURFdrive of Research Drive
- Baton: command-line interface met higher-level functionaliteit

# Integratie iRODS en VRE

- Data bestanden
- Metadata
- Toegangsrechten (access & identity)
- Schaalbaarheid
- Gebruiksvriendelijkheid

*Next steps:*

- Verder uitwerken opties met voor- en nadelen
- Bijzondere aandacht voor toegangsrechten (access & identity)
- Testen via integratie met SURF ResearchCloud

# Integratie iRODS en VRE

- Data bestanden
- Metadata
- Toegangsrechten (access & identity)
- Schaalbaarheid
- Gebruiksvriendelijkheid

*Next steps:*

- Verder uitwerken opties met voor- en nadelen
- **Bijzondere aandacht voor toegangsrechten (access & identity)**
- Testen via integratie met SURF Research Cloud

# TOEGANG ‘AS-A-SERVICE’ VOOR SAMENWERKENDE ONDERZOEKERS

- Identity verification of users
- Provisioning of user accounts – currently: manual, zero hours, social...
- Non-web systems (SSH etc)
- Provide (non-edu) guest access
- Authorization (attributes)
- 2 factor authentication
- Teams/group-management
- Deprovision (!) accounts (also when affiliation has changed)
- International collaboration, etc

AVG/GDPR

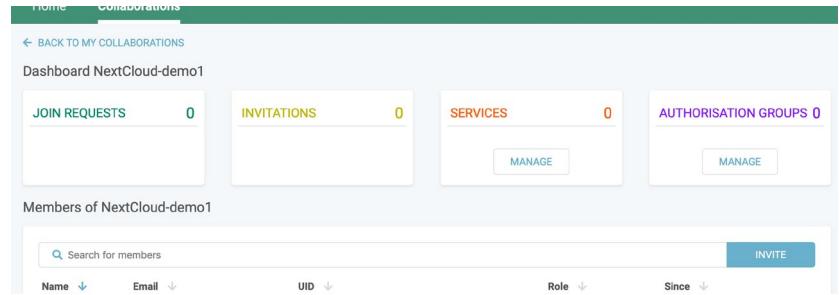

SURF

# Status update

- Policy-sessie maart
-  eduTEAMS > testomgeving bijna klaar
- [SBS](#) Membership Management System (MMS) > positieve reacties
- Dienstontwikkelingstraject vordert (0.7 eind juni naar SPA)
- SURFsara Research Cloud gebruikt het, Amsterdam UMC, anDREa, HealthRI...
- Vraag naar '3 jaar lever garantie'
- SURF praat mee in internationale gesprekken over COmanage MMS

The screenshot shows the NextCloud demo1 dashboard. At the top, there are four cards: 'JOIN REQUESTS 0', 'INVITATIONS 0', 'SERVICES 0', and 'AUTHORISATION GROUPS 0'. Below these is a section titled 'Members of NextCloud-demo1' with a search bar and filters for Name, Email, UID, Role, and Since. A large orange line starts from the bottom right corner of the slide and curves upwards towards the top right corner of the dashboard image.
