

Digital Research Environment

Digital Research Environment

DRE context

Rule of thumb: 1 workspace per research project

Screenshot of the DRE (Data Research Environment) interface showing a list of workspaces.

The interface includes a navigation bar with links for Workspaces, Data Requests, Information (Wiki/Help, Contact), and Data sources (CliniQuest, PIMS, Castor EDC). The main area displays "Your workspaces" with a search bar and a list of 16 workspaces:

- pom-ecg: Name: dws-1-POMEKG, Cost Center: 026600, Security Level: High, Status: Active
- Sam210501: Name: dws-1-Sam210501, Cost Center: dws-1-Sam210501, Security Level: High, Status: Active

Main Page

Main page Discussion View View source History

Consult the [User's Guide](#) for information on using the wiki software.

There are multiple sections about parts of the DRE. View the link for the section about the topic mentioned:

- Creating your account or setting up 2Factor Authentication (2FA)
- Accessing the DRE portal
- Accessing workspaces
- Accessing virtual machine
- Adding members to a workspace (owner only)
- Upload files/folders
- Download file(s)
- Data transfer requests

The DRE is a newly build platform, where some issues/bugs are being encountered. For the issue(s)/bug(s) listed below, we are working on a permanent fix. In the meanwhile there are temporarily workaround(s):

- Black screen virtual machine
- Data file share not loaded in virtual machine

https://wiki.researchenvironment.org/index.php/Main_Page

Logging in to the DRE

Features:

- Security.
- Access DRE Active Directory.
- Logging security via Azure Monitor.
- Logging for reports (e.g. active users).

Clip: DRE 1 – inloggen.mov

Data upload

Features

- Logging for security via Azure Monitor.
- Logging for reports (e.g. amount of upload data).

Clip: DRE 3 – uploaden.mp4

Collaboration

Features:

- Security (AD level).
- Adding members to security context.
- Controlled access instead of ‘giving away’ data.
- Expertise (e.g. statistician) to the data, instead of the other way around.
- Logging voor security via Azure Monitor.
- Logging for reports (e.g. active users).

Virtual machine

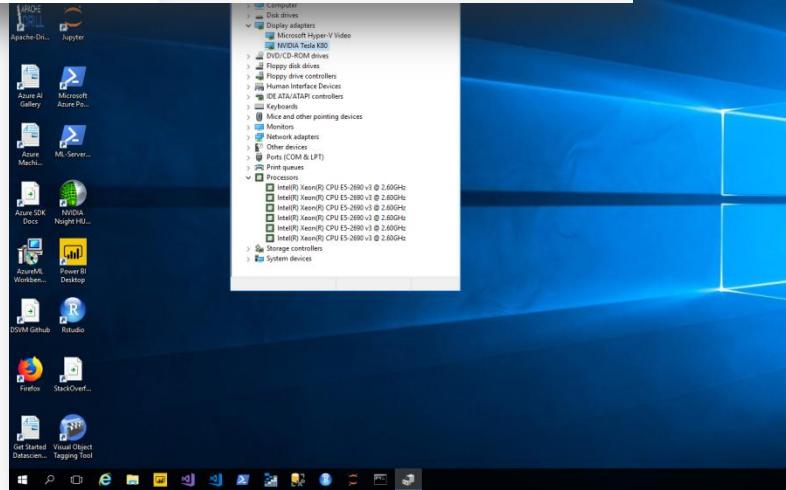

Features:

- Security > VM in workspace.
- Admin rights and different kind of users > self service.
- With two active users in the same VM
- Multiple VM's per workspace possible, working on the same data.
- Templatized VM.
- Automatic stopping VM in the evening, unless overruled.

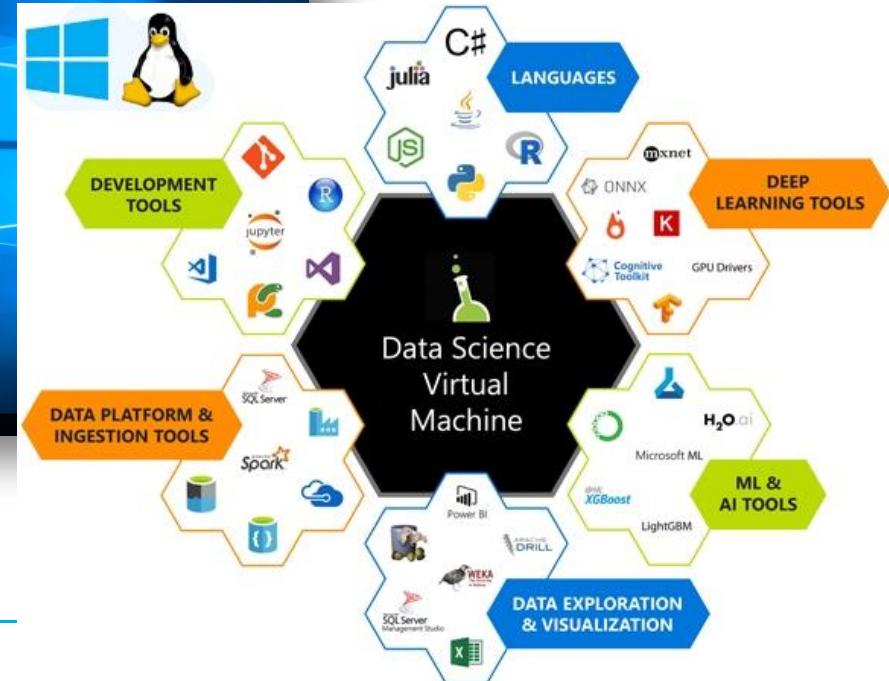

Machine learning phase 1

The screenshot shows the DRE interface with a blue header bar. Below it is a navigation bar with tabs: Workspaces (selected), Files, Members, and Virtual Machines. A large blue arrow points from the DRE interface down to the Data Science Virtual Machine interface.

Standard_D1_V2

In version 1.5
Data Science workspace

Machine learning phase 2

The screenshot shows the DRE (Digital Research Environment) interface. On the left, there's a sidebar with 'Workspaces' and 'Data Requests'. The main area has tabs for 'Files', 'Members', 'Virtual Machines', and 'Services'. Under 'Services', icons for 'jupyter', 'R', 'databricks', and 'Azure ML' are displayed. A large blue arrow points from the 'Azure ML' icon towards a detailed view of a Jupyter notebook window. The notebook window title is 'jupyter chemview_pytraj' and it shows Python code for importing modules like warnings, pytraj, and ChemView, and then fetching and transforming a PDB trajectory. Below the code, a 3D molecular visualization is shown.

Batch processing

The diagram illustrates the integration of Azure Batch with a local R session and the Digital Research Environment (DRE) interface.

My Local R Session: Represented by an icon of a monitor with an R logo.

Azure Batch: Represented by a blue rounded rectangle containing two sections: "Dedicated VMs" (with 3 icons) and "Low Priority VMs at up to 80% discount" (with 5 icons).

DRE (Digital Research Environment) Interface: A screenshot of the DRE web interface. It shows a navigation bar with "Workspaces" and "Data Requests" selected. Below this is a search bar and a sidebar with options like "Overview", "Properties", "Nodes", "Certificates", "Start task", "Application packages", and "Scale". The main area displays a "Monitor Job" titled "Azure Batch: monitor Job". It includes an "Essentials" section with node counts and allocation state, and a "Summary" grid showing the status of many nodes (green squares). A legend on the right maps colors to states: grey for Idle, purple for Running, blue for Creating, red for Starting, magenta for Resizing, yellow for Waiting for..., orange for Start Task..., cyan for Leaving Pool, light blue for Remaining, green for Online, brown for Unbound, and dark red for Unusable.

Batch processing test Een multifit analyses of high resolution image data:
>100000 images, ImageJ, now machine with 128GB/12CPU

Results

(Multi-Fit): 8 days → 5 hours 50 E16_v3 VMs (16 core, 128 gb). Costs: €270,-(Linux)

Data download

Features:

- Multiple files download.
- Workspace to workspace transfer.
- Logging for security via Azure Monitor.
- Logging for reports (e.g. how much data is downloaden).
- Organization in control.

DRE 6 - download request.mp4

CMS Program Statistics

Organization: Radboud | Publisher: Centers for Medicare & Medicaid Services

The CMS Office of Enterprise Data and Analytics has developed CMS Program Statistics, which includes detailed summary statistics on national health care, Medicare populations, utilization, and expenditures, as well as counts for Medicare-certified institutional and non-institutional providers. CMS Program Statistics is organized into sections which can be downloaded and viewed separately. Tables and maps are finalized. CMS Program Statistics is replacing the Medicare and Medicaid Statistical Supplement, which was published annually in electronic form from 2001-2013.

 Request Access

Geographic Variation in Medicare Spending

Organization: DRE | Publisher: Centers for Medicare & Medicaid Services

The Geographic Variation Dashboards present Medicare fee-for-service per enrollee spending figures in these dashboards using standardized dollars that remove the effects of the geographic adjustments that Medicare makes for many of its payment rates.

 View

Chronic Conditions Chartbook

Organization: DRE | Publisher: Centers for Medicare & Medicaid Services

Chronic Conditions among Medicare Beneficiaries is a chartbook prepared by the Centers for Medicare and Medicaid Services and created to provide an overview of chronic conditions among Medicare beneficiaries. The chartbook highlights the prevalence of chronic conditions among Medicare beneficiaries and the impact of chronic conditions on Medicare service utilization and spending. The Portable Document File format allows for online viewing and printing of the entire chartbook. The data tables provide spreadsheets with the underlying data, and the presentation includes all the chartbook figures for print or download.
