Abstract

This template is for the submission of the full manuscript for the DICUAM conference. Authors are encouraged to submit an extended manuscript consisting of a short paper (min of 4 and max of 12 pages). Outstanding contributions presented at DICUAM will be considered for publication in Elsevier Aerospace Science and Technology. Authors aiming at such an opportunity are encouraged to submit a final manuscript that satisfies the required publication standards and not exceeding the limit of 12 pages.

1 Introduction

References shall be numbered as [?].

2 Figures, tables and equations

Follow the layout described below for figures, tables and equations. Figures like Fig. 1, shall be centered. Equations numbered as:

$$\langle \Psi | QIS \rangle_6 \quad (1)$$

Figure 1: Figure caption.

The table 1 is an example of referenced elements.

Col1	Col2	Col3	Col4
1	6	87837	787
2	7	78	5415
3	545	778	7507
4	545	18744	7560
5	88	788	6344
