Subject: [mobility] proposal for inter NREN roaming

Dear all,

As promised at the mobility workshop a proposal for an inter-NREN wireless LAN roaming test. Based on some investigation we have done in the Netherlands we propose to experiment with the 802.1x standard as that seems the most likely candidate for inter-NREN roaming since it gets a lot of industry attention and scales relatively easy.

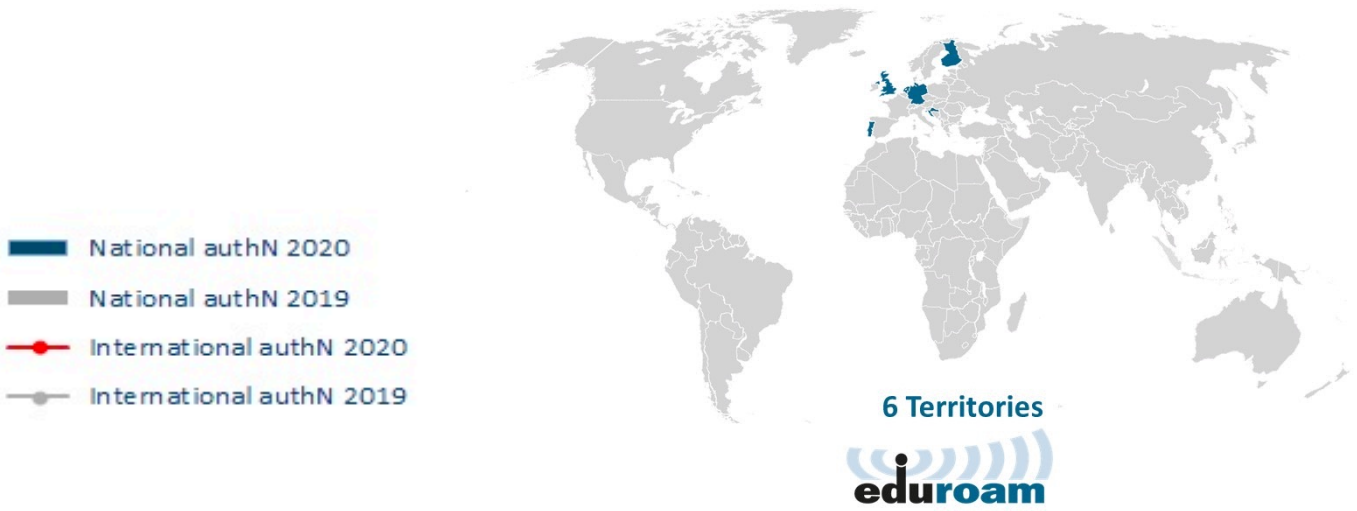

I'm looking forward to hear your comments or better ideas.

Cheers,

Klaas

Lessons learned

- Nederland is klein
- Soms zit het mee, soms zit het tegen
- Laat 1000 bloemen bloeien (maar dan moet dat wel kunnen, i.e. geen vendor lock-in)
- Gebruik (en liever nog: co-create) Open Standaarden
