

Stichting DAP

13th Geothermal Get-Together

DAP history

- Initiative for a geothermal on-campus doublet
 - Now evolved into GTD project
- Sponsorship of Professor
- Sponsorship of an Assistant Professor Geothermal Energy
 - Both positions have been adopted as permanent positions (university funded)

DAP and students

As of 2023, the DAP foundation has renewed its goals:

The main focus is to increase interest in geothermal energy, support research, and connect students, university, and the industry

Coming years with students

- Spark interest
 - Lunch lectures
 - Presentation with drinks
- A yearly big event
 - Symposium (planned for June 2023)
 - Hackathon
 - Excursions (abroad)
- Connect students and industry
 - Master and Bachelor Thesis
 - Link education to the campus GTD doublet

DAP²⁰²³ SYMPOSIUM

Wednesday, June 21st
Theater de Veste, Delft

"The Heat of the Moment; Breaking New Grounds"

The goal of achieving net-zero by 2050 combined with the current geopolitical situation creates more opportunities for geothermal energy. We now have the chance to break new grounds and take geothermal energy to the next level. However, what challenges are we facing to push geothermal forward? What role does the campus doublet play in this?

"The Heat of the Moment; Breaking New Grounds"

Wednesday, June 21st

Theater de Veste, Delft
